COVID-19 Nitrous Oxide Gas Consent

Due to the novel COVID-19 virus and unknown factors involving its infectivity and viral structure, added risks from nitrous gas systems are unstudied and therefore

unknown. I, _____,

understand the potential added risk involving the COVID-19 virus and consent to

using nitrous and oxygen gas in the office of Dr Allison Henley. I have been given

the opportunity to ask questions and am satisfied with the answers I have

received.
